

Final Certification: Expenditure Statements

At final certification, applicants must supply detailed expenditure statements (these include the final cost report, the general ledger and the final QAPE spreadsheet).

In order to achieve timely assessment of your project, please ensure that these expenditure statements contain all the required information. The general ledger in particular must contain the date of payment, the name of the payee, a *detailed description* of the budget item and the cost of the individual item.

Lump sum cash payments (for example petty cash) with little detail provided are not acceptable.

Refer to the examples below to see how we would expect to see a general ledger presented.
